PROFESSIONAL SUMMARY

To secure a challenging position in an IT company where I can utilize my technical skills and knowledge gained during my MCA program to contribute effectively to the company's success and growth.

PROGRAMING SKILL

Programming Languages: C, Java, Python

Frameworks: JDBC, Spring Boot

Web Development: HTML5, CSS, JavaScript

Database: MySQL, Oracle 10g

INTERESTS & HOBBIES

Photography | Management & Coordination | Decision Making

LANGUAGES KNOWN

English | Hindi

PERSONAL DETAILS

Mother's Name:Dineshwari Devi

Father' Name:Bhola Prasad

D.O.B.:19-01-2001

Languages Known:English / Hindi

EDUCATION

Masters of Computer Application (MCA) | Chandigarh University, Gharuan ,Punjab

Session: 2023-2025 / 7.2 SGPA

Bachelors of Computer Application (BCA) | Mirza Ghalib College Gaya, Bihar

Session: 2023 / Percentage: 70.26%

Intermediate (BSEB) | S.S.Y Inter College Gaya, Bihar

Session: 2019/ Percentage: 71%

Matriculation (BSEB) | Manpur High School , Gaya, Bihar

Session: 2016 /Percentage: 71.8%

PROJECTS

1. Smart-Contact-Manager

Here I have created a Web Application using HTML, CSS, JavaScript, Java, Spring Boot, MySQL from scratch where I am using MySQL for database purpose.

The main objective of java project on Contact Management System is to manage the details of Remainder, Mobiles, Phone Numbers, People, Address. The Project is totally built at administrative end and thus only the administrator is guaranteed the access.

In management terminology, advanced contact managers can be called individual resource management (IRM) tools – systems for managing an individual's interactions with current

and future contacts, to organize, collaborate, and synchronize health, lifestyle, and financial needs.

2. School Manager System

The School Management System in Java Spring Boot is an application developed for schools. It is an application developed in Java Spring boot which store all the school related records. it stores information about student, staff and teachers. The DataBase used is MySQL. My objective of developing such a system its to reduce the errors that creep in the manual system where it was very difficult to store record.The whole System is managed by the administrator who has all the privileges to edit or modify any school member info. A student can view his/her details by logging with their details. It is easy to use and also secure.
